DETAILED ACTION

1. This communication is in response to amendment filed 3/22/04.

Response to Amendment

Continued Examination Under 37 CFR 1.114

2. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 3/7/04 has been entered.

3. Claims 1, 7-11, 13, 16, 18, 20, 22 and 23 are amended and claims 12 and 26 have been canceled per amendment request.

Response to Arguments

4. Applicant's arguments with respect to rejection of claims under prior art of record have been considered and are persuasive. Accordingly, rejections of all pending claims based on prior art have been withdrawn.

5. Applicant's arguments regarding rejections of claims 1-27 under 35 U.S.C. 101 and 35 U.S.C. 112 (second) in light of the amended claims are persuasive. Accordingly these rejections have

Art Unit: 3624

been withdrawn. However, as discussed in the following paragraphs, the amended claims have been rejected under 35 U.S.C. 112 (second) due to newly introduced defects.

Claim Rejections - 35 USC § 112

6. Claims 1-11, 13-25 and 26-27 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

7. Independent claims 1 contain the following deficiency which renders claims 1-11 and 13-21 indefinite. Appropriate correction is required. Similar deficiency is also present in each of the independent claims. Dependent claims also inherit this deficiency. Appropriate correction is required.

Each of the aforementioned claims recite limitation "filter data". There is insufficient antecedent basis in the claim for this limitation. Additionally, the claim in the present form also lack positive and definite correlation between the processing and the generating process steps. The limitation "generating a report" requires that a distinct limitation reciting the process step of "filtering the irregular item data by removing the irregular item data that correspond to the identified irregular item". This

Art Unit: 3624

limitation provides proper antecedent basis for the subsequent step of "generating a report based on the filtered item data".

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
